

Description

This helmet TR2000 is specially designed for men working at heights.
The helmet is built to provide users with maximum comfort and enhanced safety:
Optimum upward vision by its design and reduced visor.

Enhanced comfort by its webbing suspension.

Headband adjusts quickly and easily between 45 to 62 cm using a quick adjustment ratchet.

A plastic suspension with anti-perspiration feature implementing a very comfortable terry cloth padding.

Helmet holds securely on head in all positions; helmet hold is ensured by a chin strap fastened to the helmet shell at 4 points

Optimum head ventilation ensured by 4 adjustable vents inside the helmet.

Optimum weight for maximum strength.

Helmet interiors designed to receive many optional accessories (integrated protective goggles, click-in earmuffs, foam earplugs, lamp holder).

Technical characteristics

Helmet shell made of molded ABS plastic.
